SKILLS

- Python, Frappe, ERPNext, MariaDB, Bash/Shell Scripting, Django, Fast API, GitHub, Linux/Unix, Git, Docker, REST API, Jenkins, CI/CD, Kubernetes, AWS, PostgreSQL, Linux, SQL, GitHub Actions, Prometheus, Datadog, Grafana, OpenTelemetry, Microservices

EXPERIENCE

Independent Backend & DevOps Consultant Jan 2026 - Present

Clients: Trade360 AI, Oscillix

Trade360 AI (Trading Platform)

- Built scalable **FastAPI** backend integrating **Angel One APIs** for **trade execution, real-time market data** and user authentication.
- Containerized the application with **Docker** and implemented **GitHub Actions** CI/CD for deployment on **AWS ECS** fargate cluster instances.

Oscillix (Enterprise ERP Implementation)

- Customized **Frappe/ERPNext** modules for inventory management, billing workflows, and reporting automation using Python scripts.
- Deployed the application on **AWS Lightsail (Linux)** using **Docker** and automated deployments with **Jenkins** CI/CD pipelines.

Software Developer Jun 2025 - Oct 2025

Tensteps Technologies

- CI/CD & Deployment:** Built **Jenkins** pipelines to automate the build, test, and deployment of **Docker**-containerized FastAPI microservices to **AWS ECS**.
- Observability & Monitoring:** Integrated **OpenTelemetry** and **Datadog** to establish centralized tracing, structured logging, and real-time infrastructure alerts.
- Microservices Development:** Developed high-throughput **REST APIs** and microservices (Reporting Engine, Ctrl_Domain_Mgmt, Frasa-Analyzer) using **FastAPI, PostgreSQL, Pydantic**, and **Jinja2** to maximize modularity and system throughput.

Software Developer Jan 2025 - Apr 2025

AIC-Prestige (Client: Global quantum intelligence, USA)

- CI/CD & Deployment:** Engineered **GitHub Actions** to deploy **Docker** services onto **DigitalOcean** droplets, incorporating secure **Okta SAML SSO**.
- Observability & Access Control:** Implemented **Prometheus** and **Grafana** monitoring DigitalOcean infrastructure metrics, automating role-based permissions.

Software Developer May 2024 - Jan 2025

M-ideas

- Backend Development:** Spearheaded the development of a custom task management platform using **Django** and a **Managed PostgreSQL Database on AWS**, optimizing application logic and internal workflows.
- CI/CD & Containerization:** Engineered **Jenkins** pipelines to containerize the Django application via **Docker** and orchestrate deployments onto **AWS ECS**.
- Event-Driven Architecture:** Integrated AWS SQS and AWS SNS message queues to efficiently handle heavy asynchronous background tasks and optimize high-throughput, real-time automated notification delivery systems.

Software Developer Oct 2022 - Apr 2024

Money Bloom

- Backend & Async Architecture:** Engineered a high-performance Django reporting engine for *Bluechip India*, integrating **Celery** and Redis to process complex financial data asynchronously.
- On-Prem Container Orchestration:** Architected **Jenkins** CI/CD pipelines utilizing **Bash/Shell Scripting** to deploy **Docker** containers across production **Kubernetes (K8s)** clusters on **Linux** servers, while setting up **Prometheus** and **Grafana** for alerting.
- Auction Systems & ERP Delivery:** Developed a real-time reverse auction engine using Python, while customizing core **Frappe/ERPNext** modules to optimize internal workflows for *Alufouride Ltd.*

PROJECTS

Open Source Contribution in Frappe Framework

<https://github.com/frappe/frappe/issues/33736>

Fixed validation issue in Address model (PR #33680, backport #33674, merged), improving data consistency for 500+ enterprise users.

Hyper-Scale-Ops

[Github](#) [Live-Application](#) [Live-Datadog-Dashboard](#) [Documentation-Link](#)

- Problem & Objective:** Eliminated manual deployment errors, slow release cycles, and configuration drift by building a self-healing, cloud-native deployment platform.
- Execution:** Orchestrated multi-tenant Kubernetes (K8s) clusters, implemented custom autoscaling, optimized multi-stage Docker builds (45% smaller images), and designed resilient Jenkins/GitHub Actions CI/CD pipelines, improving deployment speed by 35%.
- Impact:** Delivered zero-downtime releases using Kubernetes Rolling Updates and automated rollback strategies, reducing production recovery time from hours to seconds.

ACHIEVEMENTS

- Secured 2nd runner-up position in paper presentation at IIT BHU, Varanasi.
- Awarded best paper presentation in International Conference at ITM University, Gwalior.
- Selected for national model-making competition at PDPU, Gandhinagar and received funding from Gujarat Power Corp. Ltd.
- Student Ambassador for National Students' space Challenge, IIT Kharagpur for Gwalior Region.
